

Drupal upgrade via composer

context

dit document beschrijft hoe je Drupal bijwerkt naar een nieuwere versie ahv composer

voorbereiding

- maak een [backup van je drupal databank](#)
- maak een backup van je bestaande drupal bestanden:

```
tar -cvzf /tmp/drupal.tar.gz <drupalDir>
```

- zet je [site in maintenance mode](#)
- meld aan op de Linux server
- `cd <drupalDir> && composer outdated "drupal/*"`
zoek naar beschikbare Drupal updates.
- `composer show drupal/core-recommended:`
controleert of je core-recommended gebruikt.
Als je het gebruikt, zie je het ook staan in de lijst.
- `composer update "drupal/core-*" --with-all-dependencies:`
werkt de drupal core bij

update

1. meld aan als admin gebruiker: <https://DrupalSite/user>
2. open nu: <https://DrupalSite/update.php>

Drupal database update

✓ Operating in maintenance mode. [Go online.](#)

Use this utility to update your database whenever a new release of Drupal or a module is installed.

For more detailed information, see the [upgrading handbook](#). If you are unsure what these terms mean you should probably contact your hosting provider.

1. **Back up your code.** Hint: when backing up module code, do not leave that backup in the 'modules' or 'sites/*/modules' directories as this may confuse Drupal's auto-discovery mechanism.
2. Put your site into [maintenance mode](#).
3. **Back up your database.** This process will change your database values and in case of emergency you may need to revert to a backup.
4. Install your new files in the appropriate location, as described in the handbook.

When you have performed the steps above, you may proceed.

Continue

3. kies: **Continue, Apply pending updates**
4. klik op **logged** om een rapport van de update te zien.

afwerking

1. haal je site uit [maintenance mode](#)
2. verwijder het backup bestand: `rm -rf /tmp/drupal.tar.gz`
3. controle rapport: **Reports > Available updates**

Drupal core	
Drupal core 9.1.0 Includes: Actions, Automated Cron, Bartik, BigPipe, Block, Breakpoint, CKEditor, Color, Comment, Configuration Manager, Contact, Contextual Links, Custom Block, Custom Menu Links, Database Logging, Datetime, Field, Field UI, File, Filter, Hgfs, History, Image, Interface Translation, Internal Dynamic Page Cache, Internal Page Cache, Language, Link, Menu UI, Node, Options, Path, Path alias, Quick Edit, RDF, Search, Seven, Shortcut, Standard, System, Taxonomy, Telephone, Text, Text Editor, Toolbar, Tour, Update Manager, User, Views, Views UI	Up to date ✓
