

AD scanning

context

dit document geeft wat info rond AD scanning

debug opties

- logscheduledscanning is for the AD Computer Path scan,
- logscheduleduserscan is for the AD User Path scan,
- logactivescanning is for Active Directory Domain scan,
- LogAsyncAdComputer = AD computer info (any method (Any scan, rescan, lspush, lsagent, agentless target) that triggers this retrieval)
- LogAsyncAdUser = AD user info during Windows scanning (currently logged on user)

To Know: Async scan is only done every 24 hours or at next service restart
