

# SNMP scans

## context

dit document beschrijft een manier om Office365 scans uit te voeren.

## stappenplan

1. zorg dat je over je **scanning credentials** beschikt  
als je een Office365 account hebt, is dat al voldoende om jouw eigen gegevens uit te lezen
2. activeer uitvoering van **Powershell scripts** op je LS server:

```
Set-ExecutionPolicy RemoteSigned
```

3. maak een scanning target aan met die credentials
4. activeer debug logging:

```
<add key="LogOffice365Scanning" value="7"/>
```

5. voer een **scan** uit en monitor in logfile

```
2020-08-31 10:10:39,751 [31] INFO LOGOFFICE365SCANNING DEBUG
ScanningJob: Trigger Office 365 scanning
2020-08-31 10:10:40,263 [31] INFO LOGOFFICE365SCANNING DEBUG Office
365 - Using credential 'Office365 Testing'.
2020-08-31 10:10:48,718 [31] INFO LOGOFFICE365SCANNING DEBUG Office
365 - Fetching organization data.
2020-08-31 10:10:49,796 [31] INFO LOGOFFICE365SCANNING DEBUG Office
365 - Organization found: 'Testing' with tenantID: 006ab0d2-
c8fa-43a7-8a27-0ae2c287588a.
2020-08-31 10:10:49,796 [31] INFO LOGOFFICE365SCANNING DEBUG Office
365 - Fetching domains.
2020-08-31 10:10:50,171 [31] INFO LOGOFFICE365SCANNING DEBUG Office
365 - 4 domains found.

2020-08-31 10:19:28,898 [31] INFO LOGOFFICE365SCANNING DEBUG Office
365 - 0 contacts found.
2020-08-31 10:23:12,751 [31] INFO LOGOFFICE365SCANNING DEBUG Removing
old data.
2020-08-31 10:23:13,516 [31] INFO LOGOFFICE365SCANNING DEBUG Saving
new data.
2020-08-31 10:23:17,145 [31] INFO LOGOFFICE365SCANNING DEBUG
ScanningJob: Ended Office 365 scanning
```

## troubleshooting

### niet alle Office365 items worden gevonden

controleer of de scanning credentials over voldoende rechten beschikken
