Linux services beheren

context

dit document beschrijft hoe je op Synology Linux services beheert

servicebeheer

gebeurt vanuit commando `synoservice`

```
synoservice --list
synoservice --stop <serviceNaam>
synoservice --start <serviceNaam>
synoservice --restart <serviceNaam>
synoservice --enable <serviceNaam>
synoservice --disable <serviceNaam>
```

voorbeelden

winbind herstarten

```
synoservice --stop winbindd && synoservice --stop winbindd
```

status SSH service

```
synoservice --status ssh-shell
```

status CUPS pauzeren

```
synoservice --pause cupsd
```

meer info

- Control Synology via terminal

synology
